TOWER C, DURRËS

Even the tallest and strongest walls can be broken by earthquakes. This is precisely what happened with one of the Tower C, one of the towers of the walls of the old city of Durrës. Some parts of the wall, as big as a house, collapsed and rolled down. They must be erected and be placed at the same position again, so that the tower can stand tall again.

The "C" Tower is being restored by CHwB Albania within the project "Conservation and Reinforcement Interventions in the "C" Tower, of Durrës Castle", with the support of US Embassy Albania Ambassadors Fund for Cultural Preservation, through CHwB Albania.
