## TEKKE OF DOLLMA, KRUIË

### MURAL PAINTING

The invaluable paintings of the Tekke of Dollma were damaged by the November 2019 earthquake, along with its roof and walls. When an old painting is badly damaged, it cannot be completely recovered, but it is possible to preserve those parts that are not damaged. The more parts are saved in this way, the more we can imagine what the damaged parts were like.

The ceiling of the Tekke of Dollma was built 250 years ago, in the shape of a hemisphere, otherwise known as the "dome". It is painted with wonderful shapes inspired by trees, flowers and fruits. Its colours are also very special, as they were once realized by boiling lime powder in goat's milk.

The Tekke of Dollma is being restored by CHwB Albania within the project "Conservation and Structural Rehabilitation in the Tekke of Dollma (first category monument) - damaged by the earthquake of November 2019, with the support of US Embassy Albania Ambassadors Fund for Cultural Preservation through CHwB Albania.
